Your minimum monthly payment will depend on the outstanding balance owed on your loan amortized over the remaining term of the loan. Monthly payment example: A 20-year home equity loan for \$50,000, with an annual percentage rate of 4.50% would have 240 monthly payments of \$316.47; however, your rate is subject to change depending on the current variable annual percentage rate. A refundable deposit may be required at time of application.

Always consult your tax advisor. You must maintain hazard insurance on the property that will secure this loan. Flood insurance may also be required. Other restrictions may apply.
